TV-4

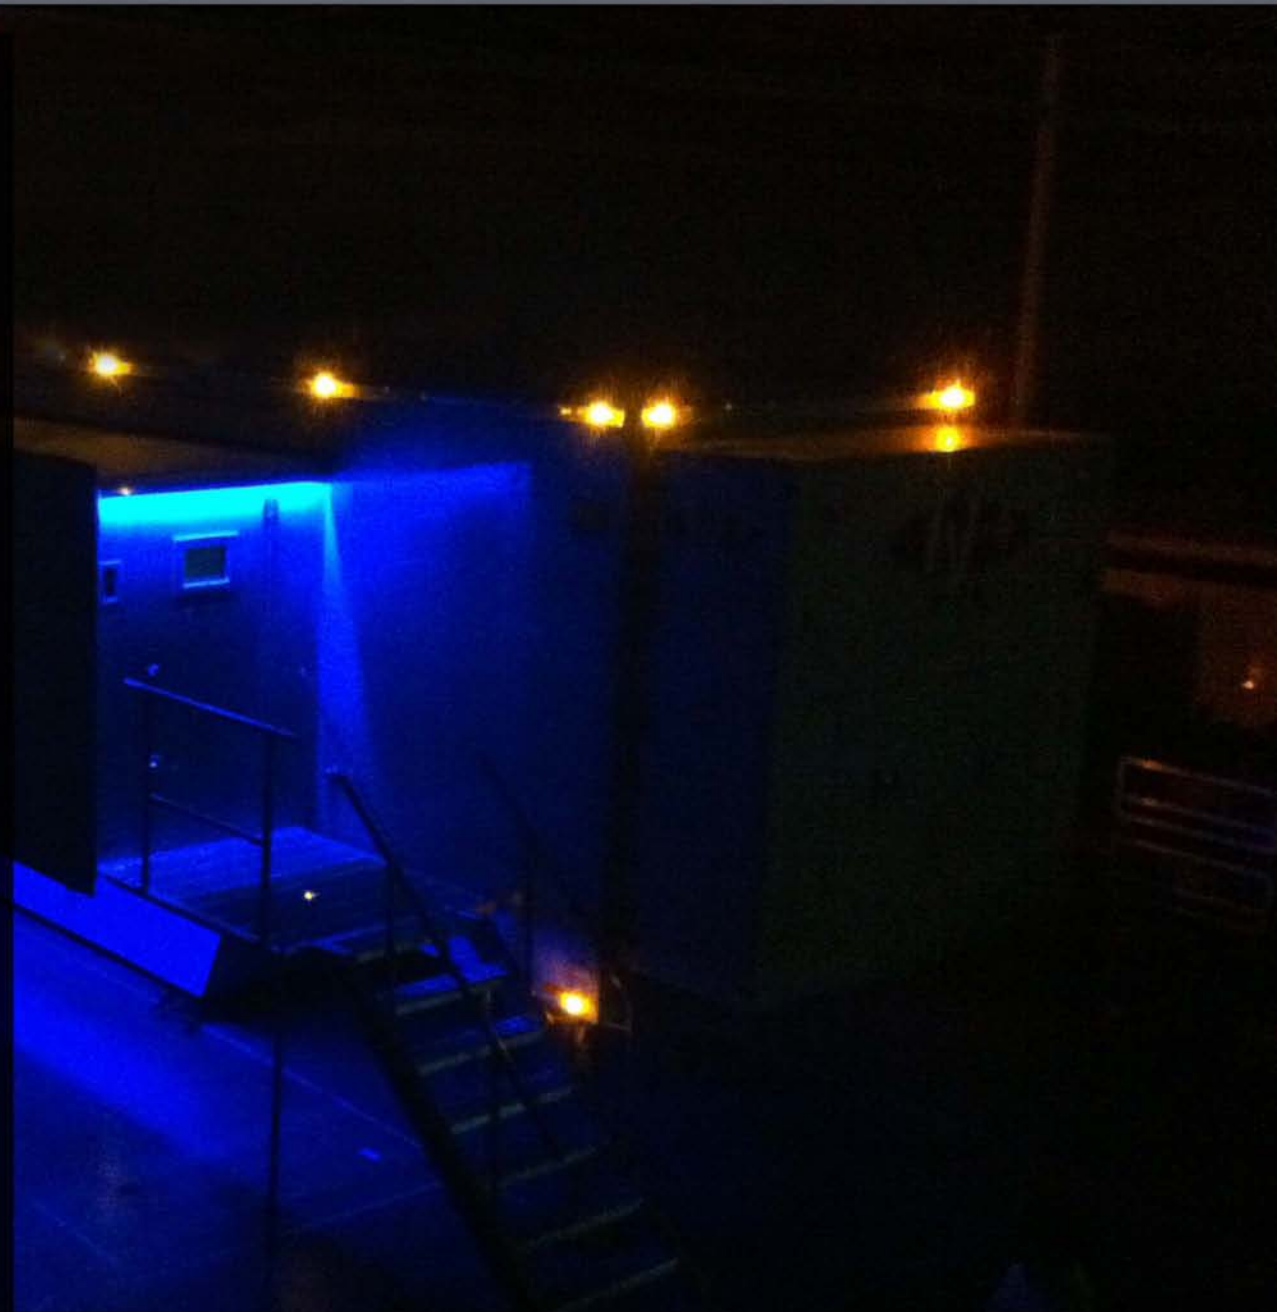

**53' ft HD Digital
Production Trailer**

Touring Video's TV-4 production trailer is our newest HD-digital mobile control room. This 53' expando trailer features an extra large control room with three rows of production consoles that can accommodate fourteen creative personnel and is designed specifically for the entertainment industry. The futuristic interior design provides an exciting change from the typical remote television truck. Besides providing reliable equipment and knowledgeable staff, we strive to make the entire production experience comfortable. TV-4 is 3D capable and is equipped with a Harris 512 x 512 Platinum 3G Router. HD Formats include 1080i, 720p & 24p.

TV-4 features a Sony MVS-8000G HD switcher. This state of the art 4ME Multi-Format production switcher features four built-in DME (DVE), Frame Stores, and 48 assignable Aux outputs. It also includes Multi-Level-Two software, which enables easy 3D switching.

The audio room features a spacious mixing booth with Stagetec's Crescendo 160 channel digital audio console and a 1024 x 1024 Nexus "The Star" digital audio router. Including two dual MAD1 streams for Pro-Tools multi track interface. The communication network consists of a Riedel Artist digital matrix intercom system interfaced with 12 channels of wet RTS, 4 channels of IFB, SA, and 4 Telos intercom phone interfaces.

Touring Video's mission is to provide synergy between technology, design and personnel and provide our clients with a unique production experience.
